-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

The indication of allowability of the present claims is withdrawn due to reconsideration of the previously applied art.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 11-15, 108-114 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Uno '239, of record.

Uno shows in figure 8 a first layer of conductive material 207; a chalcogenide layer 204; a silver layer 107; and a barrier layer 104. Claim 11 is anticipated or at least obvious as the silver layer 107 of Uno comprises AgPdCu alloy which is conductive, reflective and silver. Claim 12 is rejected as barrier layer 104 is a chalcogenide material and is "essentially transparent" to radiation of a particular wavelength. No particular radiation wavelength is claimed to unequivocally distinguish over Uno. Claim 13 is rejected as the chalcogenide layers 104 and 204 are the same material. Claim 14 is

Art Unit: 2815

rejected because GeSe material is disclosed in column 8. Such material is well known in the art for these devices. Claim 15 is rejected as silver is included in the metal layers 107 and 207. Claims 108 and 109 are rejected as above. Claim 110 is rejected as the functional language does not structurally distinguish the device over the applied art. Claims 111-114 are rejected because the layers in Uno have the same "about" dimensions.
